📁 Experience

DTP Engineer

Devabit, LLC / Dec 2024 – Present
Lviv, Ukraine (Full-time)

Technical specialist responsible for the preparation and finalization of multimedia assets for a global BPO production pipeline, ensuring high visual fidelity and file integrity through building custom automations and AI-driven workflows.

Video & Motion Graphics Engineering:

- Performed video OST (on-screen text) extraction and localization within After Effects and Premiere Pro.
- Managed the integration of translations into complex projects, including subtitle creation and DTP, followed by rendering and QC for multi-language deliverables.

AI-Enhanced Workflows:

- Engineered an automated transcription and subtitling pipeline using AI tools and Adobe Premiere.
- Utilized Generative AI (Adobe Firefly and others) to remove source OST via generative fill.
- Performed video upscaling to enhance asset quality.
- Managed AI voiceover generation and integration.

Automation & Scripting:

- Developed custom automation scripts for Adobe Creative Cloud apps via ExtendScript (JavaScript).
- Utilized Python to unlock AI-driven workflows.
- Engineered tools for automating repetitive tasks using C#.
- Built robust pipelines using FFmpeg and PowerShell to automate batch media processing and video conversion.

Document Engineering & OCR:

- Executed precise PDF-to-Word/PPTX conversions and InDesign preparation for CAT tools (Trados, MemoQ).
- Implemented AI-powered OCR for data extraction.
- Resolved critical bugs, including missing fonts, misalignments, layout and content inconsistencies.

Data Extraction:

- Performed automated and manual content extraction from various multimedia formats to support high-volume global localization workflows.

Technical Graphic Designer

Placard, LLC / Dec 2023 – Dec 2024

Lviv, Ukraine (Full-time)

Managed the full lifecycle of technical preparation and production for high-precision print and display materials in a fast-paced agency environment.

Pre-press Engineering:

Executed comprehensive pre-press preparation for large-format and digital printing, managing color profiles (CMYK), bleed offsets, and resolution optimization.

Plotter Operations:

Operated high-precision vinyl cutting machinery, preparing complex vector paths and technical machine calibrations for sticker packs and industrial decals.

Production Layouts:

Developed technical layouts for banners and commercial displays as well as other print production using CorelDraw and Adobe Photoshop, focusing on structural integrity for manufacturing.

Education

Computer Science Bachelor's degree (Artificial Intelligence specialty)

Lviv Polytechnic National University / 2020 – 2024

Lviv, Ukraine

Focused on intelligent systems, neural network architectures, computer vision, and digital image processing, with emphasis on algorithmic thinking, systems design, and computational approaches to solving complex technical problems.
